

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1-7. (Canceled)

8. (Currently amended) An apparatus configured for receiving inductive energy, comprising:

a memory for storing computer readable data relevant to receiving the inductive energy;

a processor unit for processing the computer readable data;

a coil configured to alternate between an energized state and a de-energized state at regular intervals in a polling mode and configured for receiving the inductive energy and for receiving an inductive data communication;

a power supply operatively coupled to the processor unit and the coil; the power supply configured to output a direct current powered by the inductive energy and relevant to the inductive data communication;

a battery charger for supplying energy to a separate battery pack; and

a connector for operatively receiving a portion of the battery pack for logical communications with the processor unit.

9. (Original) The apparatus in accordance with claim 8, in which the processor unit is configured to provide authentication data for inductive energy reception.

10. (Original) The apparatus in accordance with claim 8, further comprising a communications device operatively coupled to the coil.

11. (Original) The apparatus in accordance with claim 10, in which the communications device is configured to receive the computer readable data and transmit the data to the coil.
